Career Objective

Results-driven **B.Tech Computer Engineering student** specializing in **Machine Learning, Artificial Intelligence, and Software Engineering**. Strong hands-on experience in developing, training, evaluating, and deploying **end-to-end machine learning models** and **full-stack web applications**. Skilled in **Python, TensorFlow, PyTorch, Scikit-learn, REST APIs, and cloud-ready deployments**. Seeking a Machine Learning Engineer role to apply data-driven problem-solving skills and deliver scalable, high-impact AI solutions.

Experience

•Source Code Technology *45 Days*
Python Development Intern Pune, India

- Completed an intensive **45-day hands-on internship** focused on **Python programming, automation, and backend development**.
- Developed Python scripts for **file handling, data processing, and task automation**, improving execution efficiency and reducing manual effort.
- Worked with core Python concepts including **OOPs, data structures, exception handling, and modular programming**.
- Built mini-projects involving **directory automation, data validation, and script optimization**.
- Collaborated with mentors to debug, test, and optimize Python applications following industry coding standards.
- **Tools & Technologies:** Python, OS Module, File I/O, Git, VS Code

Education

•JSPM's Rajarshi Shahu College of Engineering, Pune *2024–2027*
B.Tech in Computer Engineering CGPA: 9.23

•Chaitannya's International School *2022–2024*
Higher Secondary Education, Maharashtra Board Percentage: 76.17

•Chaitannya's International School *2021*
Secondary School Examination, Maharashtra Board Percentage: 92.20

Technical Skills

Programming Languages: Python, C++, C, Swift, HTML, CSS
Machine Learning & AI: Supervised Learning, Unsupervised Learning, Deep Learning, NLP, Computer Vision, Model Evaluation, Feature Engineering
Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy
Data Visualization: Matplotlib, Seaborn
Web Technologies: Django, Flask, FastAPI, REST APIs
Databases: SQL, MongoDB
Automation & Testing: Selenium, Python Automation
DevOps & Tools: Git, Docker, Linux
Competitive Programming: LeetCode, Codeforces

Projects

•House Price Prediction System
Machine Learning | Deep Learning

- Developed an end-to-end regression model on the Ames Housing dataset using **TensorFlow and Keras**, achieving **10.7% RMSE error reduction** through feature engineering and hyperparameter tuning.
- Implemented data preprocessing pipelines including missing value handling, normalization, and categorical encoding.
- Performed model evaluation using cross-validation and visualization techniques.
- **Tech Stack:** Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

•**Automated File Sorting System**

Python Automation

- Designed a Python automation tool to classify and organize files into structured directories based on file extensions.
- Reduced manual file organization time by **90%** using recursive directory traversal and safe execution modes.
- **Tech Stack:** Python, OS, Shutil

•**Expense Tracker Web Application**

Full-Stack Development

- Built a secure full-stack expense tracking system with user authentication, CRUD operations, and analytics dashboards.
- Implemented MVC architecture with optimized database queries for performance.
- **Tech Stack:** Django, Python, SQLite, HTML, CSS

Positions of Responsibility

•**Event Management Team Member** ACM Student Chapter

•**Active Member** Coding Club

Certifications

•**Machine Learning Specialization** Coursera – Andrew Ng

•**OCI AI Foundations** Oracle

•**OCI Generative AI Foundations** Oracle

•**Crash Course on Python** Google

•**Meta Backend Developer Certification** Meta

Achievements

•**AI & Machine Learning Virtual Internship** EduSkills *2025*

•**Participant — National Hackathons** COEP | DYP-DPU *2025*

•**Active Competitive Programmer** LeetCode | Codeforces *Ongoing*
